

Southeast Commissioner Collaborates with Wastewater Enterprise

Submitted by Catherine Curtis

On Wednesday, November 30th, interviews were held for seven openings in the 9910 pre-apprenticeship program. Commissioner Brigitte R. LeBlanc from the Southeast Commission was onsite to oversee the process so she could better understand what we do and how we do it. The commissioner was invited to sit in on the interviews as an observer and was very pleased with our process, the high caliber of candidates that came to interview, and the panel members. She stated, *“The panelists genuinely want the candidates to succeed. The 9910 program will change lives and benefit the community. Their success is the community success!”*
